*Just add water*

© 2014-2015

*The new Gladstone East Shores Precinct is the latest family friendly area for us to enjoy. Gladstone boasts many beautiful parks and marina areas and East Shores adds that bit of extra variety for families to explore.*

*The water play area provides opportunities for people of all ages - from toddlers through to older children and teenagers, to have fun, keep cool and explore water safely. For family fun - just add water!*

*In 1862 the first cattle station 'Monte Christo' was registered on Curtis Island and originally took up two thirds of the island. To get cattle off Curtis, it takes the perfect tide, 4 to 5 cattlemen and their horses. Unfortunately this skill set and ongoing tradition was brought to a close at the end of last year, now only to be remembered in history books.*

*In this photograph, the manager of 'Monte Christo' George Wilson, rides in front whilst riders push cattle across through the water and onto the first sand bar. Once the first mob are across, two riders go back and get the next mob and so on, until all cattle for that crossing are all together on the bar. It is at this point that George then leads the cattle across and riders push from behind to a set of yards at Ramsey's Crossing.*

*This beautiful Kookaburra came for an afternoon visit on the balcony.*

*Mother has a rest stop*

*A wallaby is a member of the Macropodidae family, and resembles the kangaroo. The next day, young joey was seen with mother hopping gracefully about on his own feet and tail to forage on the tender grass. Mother had probably said: "It is time for me to make room for the next generation, so you will need to use your own feet and tail from now on."*

*Bait Netting*

© 2014-2015

*This photograph is of my 12 year old son, Riley throwing his cast net at Wild Cattle Creek, Tannum Sands. Poppy taught Riley how to throw a net properly at quite a young age and I think all of his practice has finally paid off! The boys were most impressed with this photograph and enjoy catching fresh bait for their weekly fishing trips!*

**Barbara Conway**  
*Southern Cross Spider*

© 2014-2015

*I found this spider while taking photographs of flowers in the garden. What a surprise!*

Jen Corbell  
*Waiting for the splash!*

© 2014-2015

*Do you remember how much fun it is to anticipate an exciting moment? These kids are cooling off at East Shores, Gladstone's newest public recreation area on the waterfront. It is a place where families and friends can enjoy many different activities, relax for a sunset, walk the dog, have a picnic, or watch the boats enter and exit the harbour.*

August 2014, Tanyalla Recreation and Conference Centre, Tannum Sands.*

**Bruce Hunt**  
*Green Frogs in the Rain (1)*

© 2014-2015

*The little green frogs (Eastern Dwarf Tree Frogs) love the rain, and can be found climbing and croaking around water.*

**Trisha Jacobsen**  
*The Garden Hat Party*

© 2014-2015

*Gladstone women love to have an afternoon garden party with wine, fruit punch, tea, coffee, savories, cakes and desserts. They often dress up and wear beautiful hats. They get together, have a fashion parade, a presentation, fun and enjoy what everyone is wearing as they have their refreshments. Often they raise money for charities by selling tickets to the event which is held in someone's nice garden. This was a winning hat! The Rose.*

*Good Morning Gladstone*

© 2014-2015

*This photograph is an ultra-wide image of Gladstone from Auckland Point following Cyclone Marcia. It was peaceful as if nothing had happened. We count our blessings that it passed us by without any major damage. Thank you.*

*Welcome to Gladstone*

© 2014-2015

*On approach to Gladstone from the North, you soon get the feel and reality of exactly how industrial the town of Gladstone is. I saw this sign and thought it highly appropriate.*

*The kids and dogs join us on Valentine's Day to watch a beautiful sunset. Very romantic!*

*The tugboat and the aluminium industry*

© 2014-2015

*I took this photograph at Spinnaker Park. I captured the tugboat, the sea and the aluminium industry as I thought it captured what it is like to be in Gladstone and how nicely all of these things blend together as one photograph.*

*The Pied Cormorant sits with wings held out to dry,  
Waiting for the sun to fill the morning sky,  
When the mist has lifted, is when this bird will fly,  
Rising slowly high up into the clear blue sky,  
This Cormorant has make this lake its home,  
Very rarely do we see its kind alone.*
